

# 407 Stays

*Solving short term homelessness*

# The Problem

*According to WFME:*

“ **2,258** people are experiencing homelessness, a 38% increase since 2022, and a “sobering” 75% increase since 2019, before COVID-19. ”

“ Around 20% of those experience it long term. **Most** people are homeless for less than 12 months. ”

There is not a good way to address these shorter term stays outside of centralized shelters.

# The Solution

Our website creates a way to connect communities organizations with people who need housing and people who want to host.

# Users Journey

Hosts and Tenants can sign up with their specific accomdations.

These can include:

- Location
- Allergies
- Pets
- Length of Stay (1 week vs month to month)

# Community Journey

Members of the local community can sign in and view the available hosts to match to their tenants they're working with.

These can include:

- Email
- Website
- List of tenants vetted by Community

# Overall Journey

Tenants will be matched with a Community Organization for interviews and vetting.

Hosts will be contacted by Community Orgnaization to meet and match with tenants.

# Communication and Discovery

Our project facilitates this communication and discovery outside of the normal avenues like shelters or hotels.

# The Impact

If you get kicked out of your home suddenly, those first few weeks are going to be the most challenging.

# The Demo
